#### *Sale Order*

Cattle will sell in lot number order, but are subject to change on sale day.

#### *Inspection of Cattle*

Sale cattle will be available for inspection at any time prior to the sale.

#### *Lot Tags*

Ear tag numbers on the sale cattle will correspond to the sale catalog.

#### *Delivery or \$\$\$ Off*

Pick up your bulls on sale day or the following day and receive \$25 off each bull purchased. Or, Gill Red Angus will assist in making delivery arrangements of the sale animals to the new purchaser's destination at the least cost possible. All such deliveries are at the buyer's risk.

#### *Sale Terms & Conditions*

Any terms and conditions not covered by the catalog will refer to the Standard Terms & Conditions set forth by the Red Angus Association of America.

#### *Gill Red Angus Guarantee*

All bulls are guaranteed breeders. Any bull that settles one third or more of the healthy cows he services or passes a fertility test made by a competent veterinarian during the first six months after the sale date is considered a good breeder. All claims for adjustment or refund must be made within six months of sale date. All bulls returned must be in good and healthy condition. Any bull given a fertility test within the first six months after the sale date will be at the buyer's expense, unless the bull fails the test at which time the seller will pay for the fertility test. All bulls returned must be transported at buyer's expense.

**"You buy our bulls, and we will bid on your calves."**

**The Gill Red Angus pledge  
to our commercial customers -**

**"YOU BUY OUR BULLS.  
WE WILL BID ON YOUR CALVES."**

We traveled the country this fall and bid on several thousand head of feeder calves. The quality of the Gill Red Angus-sired calves came shining through as they either topped the market or came in a close second.

Hello,

We would like to welcome you to the first-ever Gill Red Angus "You Buy, We Bid" Fall Bull Sale. We've been having bull sales for 13 years and have been in the registered Red Angus business for 26 years. But this marks our first-ever fall bull sale. We switched the sale to the fall because we changed our calving season to May and June. We now offer mainly 18-month-old virgin bulls that have been raised on grass in the pasture, not in the feedlot. These bulls will be able to service more cows than a typical yearling and will hold up much better too.

Wow, what a fun time to be selling calves and yearlings! The prices this fall have been crazy, but well-deserved. We are hearing reports that most people are getting from \$20 to \$50 a head more than last year. A lot of our customers are taking \$800 a head home, right off the cow! There is a huge demand for Red Angus heifer calves too. Most of our customers that have a group of red-hided replacement heifers are getting more for them than for their steers. That's a great reason to use more Red Angus bulls.

As we have promised to you in our ads, catalog, on the phone and on the website, we have been bidding on your calves at the barns, on the phone with Superior, and at your ranch this fall. These efforts have made a huge impact on the prices that our customers are receiving. Just take a look at this. We have bid cattle up as much as \$5 per hundred weight on a load of 600-lb. steers. This is an extra \$30 per head, or an extra \$2,500 per load. That is almost a free bull, considering our prices this past spring. Yes, the prices are outstanding again this fall, but won't it be nice to have a guaranteed bidder sitting in the stands on sale day when this super price does start to go down. We don't just bid. We have bought a good portion of the calves that we bid on this fall. The number of calves that we have purchased is fast approaching 1,000 head.

Now that the word is out that we are bidding on our customers' calves, we are getting calls from small feeders that are looking for Red Angus calves to feed. These feedlots really like to feed Red Angus and Red Angus-cross calves because they are consistent and perform so well. They now know that the red hides are just as good, if not better, than the black-hided calves. In fact, Samson-Inc. made the most money the whole year on a set of Red Angus-cross calves. We are hearing this more and more each year.

We are also starting to offer Red Angus replacement females in our sale. This will be the first of many years that we will be selling commercial females. Our plan is to offer more and more every year, with all of them coming from either our herd or our customers' herds. In this sale, we will have 57 bred heifers and 15 open heifers. This is a powerful set of bred heifers. And I know you will really like them. The bred heifers will come off the pastures the day before and be penned for the sale.

The bulls are again a great set. They are stacked full of performance, maternal and calving ease. We do have several heifer bulls as well as many more performance-type bulls. Most of the bulls are off of the first- and second-calf heifers and a few older cows. The genetics are fresh and some of the best in the country. All of the bulls and heifers are cake broke, and we started to feed the bulls a little while still on grass around November 1. But don't expect to see bulls in the typical selling condition you usually see in the spring, because we didn't pump a lot of feed into them. They are in the ideal condition that we think bulls of this age should have to have the production and longevity that our customers' need.

So with this marking our first-ever "You Buy, We Bid" Fall Bull Sale, we would personally like to invite you to come out on December 7. Have a look, a good visit, and if nothing else, come and have a hot bowl of chili and just enjoy a day off in western South Dakota. Thanks and we will see you on Dec. 7.

*The Gills*

We are starting off the first-ever Gill Red Angus Fall Bull Sale with a very impressive-looking bull that has everything going for him. He is big and stout, thick and long, and has that great bull look to him. He is a son of LMG Gills Monument 1504, our high-selling bull in 2003. Monument 1504 has thrown some great sons and daughters that have a lot of muscle and length. In fact on average, he throws the longest bodied calves of all of the sires used the last few years. Look to this guy to add the extra performance needed to meet the industry's demands. **Pen: By Sale Barn**

Lot 2

This is quite the bull. 7014 is one of the thickest bulls in the sale and always has a lot of flesh on him. We didn't feed these bulls like most bulls are fed out. They were summered on grass and wintered like a replacement heifer. But he has always had a coat of flesh on him. That tells me that his daughters are going to be very easy fleshing. 7014 is extra long and very thick with a lot of style and body. He has been a favorite here all summer, and by the pictures you can tell why. He is a son of Feddes Grand 224, who is a son of the \$50,000 Grand Canyon. He is one of the more maternal sires in the breed and yet is full of performance — something that doesn't usually go together. Grand Canyon is a maternal brother to the all-time, high-selling Red Angus bull, the \$220,000 Major League, and just recently another maternal sister sold for \$62,000 at the NILE. On the bottom half of this pedigree you will find a very heavily bred Chief line cow. As you can tell, this is a very sought-after pedigree. This is the type of bull that will put you in the next league. Come and take this big boy home. *Retaining one-quarter semen interest. Pen: By Sale Barn*

0.9	36	65	16	34	13	83	768			

Wow! He's a direct son of the \$8,750 cow we sold at the Santa Sale in 2004 as the "Pick of the Herd." Nothing held back. The buyers came to the ranch and went through the cow herd with a fine tooth comb, and they chose this cow. It wasn't a surprise to me because it was the cow I would have chosen too. Study her picture and take a look at her awesome profile and udder. She is absolutely beautiful. Her daughters, dam, grandam, great-grandam and herself all have MPPAs of 101 or higher. This is definitely the line you want to keep daughters out of. Now, his sire is the great performance sire, VGW Rattler 908. He is a bull we have been using for several years, and he has never let us down. He always throws a lot of muscle, length and style. This cross is destined for great things. We have sent Rattler offspring all over the country and have heard nothing but good things. He works, and this guy will work for you even better. 4528 is really long, very thick and has more middle than any other Rattler bull we have raised. He gets that from his dam. He has a really straight top line and will sire some outstanding sons and daughters. So come to the sale on Dec. 7 and take this guy home. You will never regret it. *Retaining one-quarter semen interest. Pen: By Sale Barn*

Last spring we sold our first Heavens Door sons. We were a little worried going into the sale because they were a little different style than we have ever had before. They were packed full of meat, muscle and length, in a Frame 6 package. We really liked them but didn't know how you would. But I guess you did, because they were the overall highest selling group of bulls we have ever sold. This guy is just like the rest of them — very thick, deep and long. His dam is an outstanding cow with a MPPA of 104. You will want to keep the daughters out of this guy, as his daughters will be easy-keeping, high-performing and heavy-milking. His sire, Heavens Door, is a son of a Canyon daughter that is a maternal brother is King Rob. She is one of the best-looking Red Angus cows I have seen. This is where he gets the extra depth of rib, because she is extremely deep and very thick with a super udder. You will like this guy. Oh, yeah how about that weaning weight! **Pen: By Sale Barn**

Okay, here is the longest bull in the sale. I am not sure if we have ever raised one this long before. He isn't just a rope either. He has enough middle and muscle to go with it to make him a great bull. His sire is a son of the great Rambo 502 and the \$50,000 Flo-Marie 185. This cross has proven to be a very high-maternal line for us. His dam is a daughter of Run Cloud 525. His daughters have had the high-selling lot in the last five sales we have had. Run Cloud's total maternal EPD is now 45, and it is the real deal. He is the highest maternal bull we have ever owned. His daughters are all outstanding. We only have nine straws of semen left on him. We are using it to flush our best cows to hopefully get as many embryos and daughters as we can. Make sure you check this guy out on sale day. He is good! Oh ya, he ratioed 165 for marbling and 103 for ribeye! Not only is he stacked full of maternal and performance, but he has it in his carcass too. **Pen: By Sale Barn**

*Friend & customer, Brady Burress, helping us "cull" for our next sale.*

Here is another grandson of Run Cloud 525. He just doesn't quit. Year after year the Run Cloud daughters continue to do it. But to top it off, his dam is double bred to Run Cloud 525 and has a MPPA of 102. He has the maternal power you need. He is also a son of VGW Chateau 128, who has really given us some growth, muscle and body. 4602's daughters are going to be fancy and will produce the kind of calves that will make you money. He is really thick, long made, and easy fleshing. He has the natural thickness you are all looking for. Now to go the extra mile, 4602 has a 122 ratio for marbling and 110 ratio for ribeye. This is exactly what the consumers are demanding. He will put you in front of the pack. Take advantage! *Retaining one-quarter semen interest. Pen: By Sale Barn*

*J.R. Marshall putting his mark on his next herd sire from Gill Red Angus.*

0.7	34	61	20	37	11	74	650			

This is a head turner. 4639 is a brother to Lot 15, and he will do a lot of the same things too. He has a 115 ratio for ribeye and a 109 for weaning, while only having a 74-pound birth weight. Check him out on Dec. 7. **Pen No.: 101**

The next 10 lots were all born in August 2004 and will be around 16 months old. They are all ET calves and were raised on some commercial cows in North Dakota. So remember, if the birth weight seems a little big or the weaning weight a little light, don't put all the blame on the bull calf himself, because they were raised by a cow that is not Red Angus and was wintered and summered differently than we do. This is why the Red Angus Association will never ratio an embryo calf. They are all in a single contemporary group. Their true test has been on grass this summer, and they came shining through. They are all out of some of our very best genetics. We are proud to offer them to you, and I think you will be impressed by them. **We will run all sets of brothers in the ring at the same time and sell in catalog order.**

LMG Cora 537  
LMG Srsett 724 { Hammel Run Cloud 525  
LMG Srsett 546

Okay, we are starting this pen of fall-born ET bulls with a couple of studs. These two full brothers are sons of our 2000 high-selling bull for \$6,000 to Rock Creek and Double Diamond. He was one of the flashiest bulls we have ever raised — full of performance, thick, extra long and out of a great cow. The dam to these two is a super donor cow we raised and out of our "king of the cows" sire, Hammel Run Cloud 525. His daughters have always shined and have been at the top of our herd for several years now. They have raised the high-selling lot for us five years running. Just to name a few, they have raised a Monu 4X son that topped our 2003 bull sale for \$4,500, a Rattler son in 2004 for \$6,500, a Rattler open heifer in the Santa Sale for \$4,000, a King Rob bred heifer for \$5,000, and this spring a Wide Spread son for \$9,000. These guys will be on this list after this sale. They have a lot of style, growth, muscle and length, while being out of a super cow. Don't be fooled because we don't have any pictures of them. You really need to sit up and take a look at these guys. They are very, very good! Come and take a look on Dec. 7, 2005. *Retaining one-quarter semen interest.* **Pen No.: 102**

Three progeny out of Run Cloud daughters -  
Other Run Cloud grandsons are featured on the  
inside back cover.

Three more full ET brothers that will improve anybody's herd. The sire is a super birth to yearling spread bull, that throws a lot of muscle and length. These guys are no exception. They are just like that. Really thick and extra long, while having a lot of class to go with it. Monu 4X is the sire of Gills Monument 1504, a sire to several bulls in the sale including Lot 1. We have a handful of Monu 4X daughters in our herd, and they are doing a really good job. They all have a really good look to them with great udders. The dam to these three is one of those cows that was always in great shape. She's very thick and long made. She was sold to JD Red Angus in our Gill's Girls II Female Sale. This past spring we sold another ET brother for \$3,750 to Todd Biel, an excellent commercial rancher who demands performance and growth in his herd bulls. I really like these guys and I know you will too. **Pen No.: 102**

*Sire of Lots 22, 23 & 24*

This is another really good, Mr. Beef son that will put a lot of grow into your next calf crop. He is very thick, classy and out of a super cow. We will run him in the ring with the last two lots and sell him last. The Mr. Beef cattle will really give you a lot of performance in the feedlot. Cheap gains is what we all need to make it work these days. In 2004 we sold a full ET brother for \$3,800 to Bill Burress, who is a long-time customer and a great friend that has a super set of yearlings that top the market every year in Faith, South Dakota. Make sure that you look up this excellent bull on sale day. You won't regret it. **Pen No.: 102**

Sire of

Okay, here are two full ET brothers that are out of one of our best cows on the place. She is a direct Rambo 502 daughter, and every year she has one of the best. We sold a top son of hers a few years back to Kuhn's Red Angus for \$3,500, and he has used him hard ever since. Her first calf sold to the Hanson Ranch in South Dakota and Texas for \$6,000. She is now in their flush program and is working out great for them, raising their top bull calf this summer. This is a very high maternal cow with a lot of punch to her. We really like her, and she is a favorite any time someone stops and looks at our cow herd. The sire is the undisputed birth to yearling spread sire in the breed and a popular ABS bull. He promotes calving ease with a tremendous amount of growth. These two are just like that. Make sure you look for these two bulls come Dec. 7. **Pen No.: 102**

Here is a close relative to the Lot 3 bull. He has the same sire, and his dam is a maternal sister to Lot 3's dam. The only difference is this girl goes back to Rambo, which I think is even better. The Sara line is also in the top three female lines at Gill Red Angus. This is another bull you will want to keep daughters out of, and the steer calves will really weigh up for you. Check out his weaning weight of 748 pounds while only having an 85-pound birth weight. **Pen No.: 103**

This guy doesn't sell with registration papers, but don't let that stop you. For some reason things got messed up on the trip to Fargo, so we don't know which cow is his dam. But we do know that he is good. He might have the most body of any bull in the sale, and he definitely has the best disposition. This fall when we were feeding cake to the bulls, he was eating out of our hands. We would shove it in as fast as he would take it. He looked like a packrat with it all in his mouth as full as he could get it. He loves his head rubbed. 4569 is another son of Heavens Door, and I know you will like him. **Pen No.: 103**

We saved one of the best carcass bulls for the end of the sale. First of all, he only had a 75-pound birth weight, and we used his sire hard on our heifers. Then he has these great carcass ratios — 116 for marbling and 103 for ribeye. They will grade very high for you, and that is what makes you money when you sell in the meat. Be sure to check him out on Dec. 7. **Pen No.: 105**

*Larry, the manager...*

**"You buy our bulls, and we will bid on your calves."**

*A sampling of the bred heifers*

## 57 56 Bred Red Angus Heifers

One-half of these 56 bred heifers are home raised. The other half were purchased from Tracy Collins, a customer of ours. Thinking he was not going to have any grass this past summer, Tracy offered for sale all of his replacement heifers, and we purchased them.

The bred heifers will be cake broke for all you cowboys who feed cake to their cows. These heifers were put on grass in April and have not seen any extra feed at all. We will start caking these girls in November, just so they know what it is. They will be brought in the night of December 6 and penned for the sale. They will be weighing around 1,100 lbs. come sale day. *Bred from 5-17-05 to 7-5-05 to Gill Red Angus calving-ease bulls.* They are top-quality heifers that have a lot of maternal and performance bred into them. We will have weights available on sale day.

## 58 15 Open Red Angus Heifers

These 15 open Red Angus replacement heifer calves are owned by Prince and Sons at Hays, South Dakota. They are the first customer to take advantage of our customer heifer marketing program that we developed. We started this so our customers can sell their open and bred replacement heifers and cows through our sale. We have spent several thousand dollars on advertising over the years, and we are letting you use our name and sale to market your cattle. These heifers will be first-class quality Red Angus replacement heifers and will be weighing around 700 lbs. come sale day. These heifers are stacked with performance and maternal cow lines. We will have the average weight available on sale day. *Contact Gills at 605-865-3288 or Prince and Sons 605-567-3305.*

*Gill customers can receive a 3% discount on all vet supplies purchased through DeTye Vet Supply.*

			Fancys Miss Gill
		Miss Leo Roan	{ Red Cedar Bark
			{ Fancys Miss Gill
			{ Raiders Leo
			{ Tom's Roan Baker

Calling all cowboys! My name is Festus, and I am a ranch horse deluxe that is very easy to be around and catch. I have seen and done everything there is to do on the Gill Red Angus ranch. I have tagged calves, dragged 'em to the fire, doctored them out in big country, and helped gather them back in for weaning. I really enjoyed all of the sorting involved at Aling and weaning time. I have a lot of energy and absolutely love to get up and go in big country, but yet I can turn it down and be calm and quiet when asked. Kenny says that I am not for beginners, since I can get a little fresh once in a while. But I am trying really hard to get over this. He also says that I have scar on the back of my front left hoof but it doesn't seem to bother me. Come check me out on sale day. I think you will like me.

*The next two horses were consigned by our good friend and neighbors at the Bar LD Ranch. Bill and his boys do a lot of cowboying for us and lots of day work for other ranches in the area. Bill can be reached at 605-865-3194.*

Lot 60

Lot 61

**60**  **Little Blackie**  
 GRADE FIVE-YEAR-OLD BLACK GELDING

This little horse has dragged a lot of calves. Anybody can ride him. He's been used to pen back at the sale barn. I started heeling on him, and he took to that really well. He would make a great prospect for someone looking for a young rope or ranch horse.

**61**  **Darrel**  
 GRADE SIX-YEAR-OLD GREY GELDING

This is one class act that just keeps getting better. He was used on the ranch, pen back at the sale barn, and started heading and heeling. Don't let the fact that he is grade fool you. He goes back to watch Joe Jack, Ima Tyree by Harlan's Tyree by King and add some Sea Bar by Lightning Bar.

# The Gill Red Angus Customer Marketing Program

*"You buy our bulls and we will bid on your calves."*

Something we offer that most of our competition does not is a Customer Buy-Back Program. Our slogan is "You buy our bulls and we will bid on your calves." This has really helped our customers on selling day. We ran some calves up as much as \$5 per hundredweight. You add that up on a load of 600-pound steers, and you made an extra \$2,500 just by being our customer. Compare that to our sale average the last couple years — that's a free bull. How can you go wrong?

## Here is how it works:

- First, you must be a Gill Red Angus customer. At marketing time, contact Gill Red Angus with the marketing option you wish to pursue:
  - Complete Retained Ownership
  - Partial/Partnership Retained Ownership
  - Livestock Auction or Off-the-Farm Marketing - Sell 100% of your calves off-the-farm or at the stockyards and a Gill staff member will be there to place a bid on them for you.
  - Replacement Heifer Marketing - Market your top-quality open and bred heifers through our production sale in December. (We have spent thousands of dollars on advertising over the years. Use our past advertising and known name to market your replacement females.) Call for more information.
- When possible, we will work with our customers to help form co-mingled loads of calves.
- To determine the value of your calves, Samson-Inc will compute the "breakevens."
- Once the above is completed, the calves will be shipped to Samson-Inc Feedlot.
- Upon harvest, if possible, Gill Red Angus & Samson-Inc will prepare a report complete with feedyard and harvest data for your use. The Gill staff will then schedule a meeting with you to discuss ways we can help add profit to your bottom line.
- We are also available for consultations regarding breeding, replacement heifer procurement, and all marketing options. We will help you any way we can to make your bottom dollar grow.
- Gill Red Angus customers can now receive a 3% discount on all vet supplies purchased through DeTye Vet Supply. Contact us for more information.

Several years ago we began looking for opportunities to achieve a competitive advantage in the beef industry. To gain that advantage we needed to be a part of a coordinated system that provides a consistent, low-cost, uniform product to the market place. This concept has evolved into working with Gill Red Angus, which produces genetics that provide high-growth bulls that meet premium carcass specifications. These characteristics allow us to pass on a higher value to producers while still reducing our costs of production.

Gill Red Angus has been a leader in working with us to identify producers who are buying these bulls. When the producer markets their calves, the Gills' have been representing us by bidding on the cattle that will fit our objectives. Once purchased or retained, we can turn our attention to developing the communication and information sharing programs that will reward us from conception to consumption. Developing these programs allows us to reduce costs of production throughout the chain and position us to add value to our end product. This value-added product may be as simple as a complete source-verification data base to attacking specific beef markets with a predictable product.

Even though the value-added market is the ultimate objective, reality says we have to be successful on the production side first. Calves gaining over 3.3 pounds per day, converting at 5.6 to 6.1 pounds of feed to pound of gain and reaching a 900-pound carcass weight is a power offense to the challenges that are faced in the beef industry. Many calves produced from Gill Red Angus genetics have been reaching these targets.

We are excited to be a part of this growing coordinated system. The results that we are seeing from working together give us confidence that we will all achieve our objectives.
