Everyone needs to take a look at this tank. He is long, very deep, really thick, dark red, out of a great cow, and the kind that can do it on grass alone. He is a herd sire prospect, and will work in most any herd in the country. We kept a Sakic son out of this guy's dam to use on our heifers. Take a look at his birth to weaning spread on his individual performance. If you are the type of rancher that only buys out of the front pen, do yourself a favor, walk back and take a look at this guy, you will be glad you did.

This bull has all the pieces to make some great females and powerful feeder calves. In the pedigree you will find Dakota Rambler, his pedigree is known for excellent females with some added performance. Then you will see his sire, Vin Diesel, who is out of Red Dawg, both are known for powerful growth, extra length and a lot of muscle, but also Vin Diesel's dam is a top donor cow for us. This pedigree has proven to work for us, and it will for you too.

We have a lot of Vin Diesel's in the sale, but we strongly believe that he will do our customers a lot of good. He covers all the bases, as his dam's cow family is one of the very best for soundness, productivity, longevity, fleshability, and udder structure. His sire has given us more muscle and length than any other bull we have ever used. So when we combined the two we had great hopes, and then it worked. He is very impressive to look at, and his calves are doing what we had hoped. The jury is still out on his daughters as we will calve his first daughters this spring, but we are confident they will be good.

This good calving ease bull came in a little light. He was suffering from pneumonia early in the summer. By time weaning came, he was over it, but was set back do to it. He really caught up over the winter and on grass. Don't let the weight bother you, because if he wasn't sick over the summer, he would be in the mid seven weights. Put him on some heifers and forget about him.

This big powerful bull has a calving ease pedigree, as we have used this guys sire and maternal grandsire both on heifers, while they gave us good performance as well. This guy has alot of eye appeal, is dark cherry red, long bodied and was born under 80 lbs. The daughters out of Run Cloud were always some of the top producers. 944 is also the grand dam to the Lot 9 bull, and was just sold as a 12 year old cow. Check them both out.

The Wide Spread bull has done a lot of good things for our program, but the #1 thing he has done is add a little extra touch of maternal power to our program. His daughters are beautiful made cows with great udders and feet. They are easy keeping and do it on their own. This guy is a moderate made bull without any extremes anywhere, but very complete across the board. His dam is a top cow with a 105 MPPA.

Take a look here. He weaned off at nearly 800 lbs, and was born under 80 lbs. His dam is a super cow who is always fat and happy. She has a 105 MPPA and goes back to Rattler and Red Rocket. Both of these bulls were used hard here in the past. Take a good look at his photo, then look at his dams photo. Both are very impressive and powerful. This is what it is all about.

OK, this lead off bull of the yearling pen is a son of the very impressive Six Mile Full Throttle bull at Genex, and boy is he is meat wagon. Every way you look at him, he is good. He has it all, just take a good look and you will see that he has the depth of body, extra muscle, length, style, and soundness that we all demand in a herd sire. His dam is a super Milk Creek Data 5101 daughter that has a 102 MPPA. While his grand dam has a 101 MPPA, and great grand dam has a 101 MPPA. The maternal end of this bulls pedigree is very maternal, while the sires side is very powerful. The combination of the two will make some awesome calves!!!
