correspond to the sale catalog.

DELIVERY OR \$\$\$ OFF

Pick up your bulls on sale day or the following
day and receive \$25 off each bull purchased.
Or Gill Red Angus will assist in making delivery
arrangements of the sale animals to the new
purchaser's destination at the least cost possible.
All such deliveries are at the buyer's risk.

SALE TERMS & CONDITIONS

Any terms and conditions not covered by
the catalog will refer to the Standard Terms
& Conditions set forth by the Red Angus
Association of America.

SEMEN TEST

All bulls will be semen checked before sale day.

GILL RED ANGUS GUARANTEE

All bulls that are in good breeding condition at
the beginning of the first breeding season are
guaranteed breeders. This does not include any
injury. Any bull that settles one third or more of the
healthy cows he services or passes a fertility test
made by a competent veterinarian during the first
six months after the sale date is considered a good
breeder. All claims for adjustment or refund must
be made within six months of sale date. All bulls
returned must be in good and healthy condition.
Any bulls given a fertility test within the first six
months after the sale date will be at the buyer's
expense.

"You Buy Our Bulls, We Will Bid on Your Calves"

Hello Ranchers,

The winter has started off with a bang. As I sit here this morning drinking my coffee, the radio announced that Bismarck has reached a new record for snow fall for the month of December with 32 inches and it is still snowing. This white stuff does make for a little extra work right now, but come spring we will all love it. It will up fill dams, get the rivers running, and give us green grass! Life is much easier when Mother Nature works with us instead of the other way around. The western part of North Dakota had a dry year in 2008, but the spring of 2009 is looking better now.

The last few weeks the cattle market has been on the rise and things are looking more positive than they did a month ago. The optimism is rising among the larger feeders with which we have been visiting. Indications are we are in for a very strong upward trend. The world population is growing by 23,000,000 people every year and the U.S. alone grows by about 2,300,000 people every year! This is a lot of extra people that we need to feed, and the U.S. cowherd number is lower than it has been in 50 years. With the combination of the larger population and less protein available, exciting things are about to happen and demand is about to take over.

The bulls in this sale are another super set of bulls. I believe this is one of the strongest and deepest sets of bulls we have ever raised. The quality runs deep all the way to the end. Since the majority of the bulls are from our embryo transplant program, we sorted the bulls by pedigree, instead of sizing them like we normally do. So make sure you walk into each pen as each group of brothers has a very top end amongst them. These embryo bulls are out of the absolute best bulls and cows available. They will make you a great set of steers and heifers. If you need more than one bull, we encourage you to buy some full or half brothers and make your self a very even set of feeder calves and cows.

On Another note, we do not record birthweights on any of our ET calves. We don't because the recip mothers to these calves are managed different and are of different breeds as they are raised by several different ranches in MT, ND and SD. Some of the cowherds are Angus weighing 1100 lbs, while others are continental cross weighing well over 1400 lbs. The actual birth weight of these bulls have absolutely nothing to do with what these bulls will produce in their offspring, therefore we do not record any birthweights on these cattle. He will breed true to what his genetics are.

The replacement heifers in the sale are some top quality young ladies. They will all be weighing around 700 lbs sale day and will be in perfect breeding condition. They have been cycling, so all things are in order. These girls all come from a few of our bull customers. We purchased one group from Dan and Tara Hooper from Merriman, NE, while the other heifers are consigned by the Tarter Rancher from Camp Crook, SD and the Hofland Ranch from Reeder, ND. Both Hofland and Tarter sold their heifers here last year and they looked and did great. This fall, Hofland sold his steers calves weighing 550 lbs for \$122.00/cwt. We purchased Tarter's steers and they topped the market that day. Hooper's steers also topped the market the day they sold and we purchased them as well. These girls are all made by top commercial ranchers and they will work for you.

It seems like we are always running somewhere and bidding on customers calves. We have purchased a lot of them again this past fall and winter and it has really helped you out. Just by us bidding, you nearly always top the market or come darn close. But where it really shines is when you get an additional \$3 to \$5/cwt for your steer calves. Add that up on a pot load and it comes to a couple thousand extra bucks just by being our customer! I invite you to read more about this on our customer service page in the catalog.

The way we see it, the commercial rancher really only has one customer, and that is the feeding industry since they are the ones that buy your calves. Your seed stock provider had better be raising the type of product that both the commercial ranchers and the feeder can use. Here at Gill Red Angus, we feel we are. We do all of our homework for you, and find out what works and what doesn't. Rest assured that if you are our customer, we will do everything we can to help you improve your bottom line and your next calf crop.

See you at the sale.

The Gill Red Angus Customer Marketing Program

"You Buy Our Bulls, We Will Bid on Your Calves"

Something that sets us apart from most of our competition is a Customer Buy Back Program. Our slogan is "You buy our bulls and we will bid on your calves." This has really helped our customers on selling day. We ran some calves up as much as \$5 per hundredweight. You add that up on a load of 600-pound steers, and you made an extra \$2,500 just by being our customer. Compare that to our sale average the last couple years - that's a free bull. How can you go wrong?

Here is how it works:

✓ First you must be a Gill Red Angus customer. At marketing time, contact Gill Red Angus with the marketing option you wish to pursue:

- **Complete Retained Ownership**
- **Partial/Partnership Retained Ownership**
- **Livestock Auction or Off-the-Farm Marketing** - Sell 100% of your calves off-the-farm or at the stockyards and a Gill staff member will be there to place a bid on them for you.
- **Replacement Heifer Marketing** - Market your top-quality open and bred heifers through both of our annual production sales in February and November. (We have spent thousands of dollars on advertising over the years. Use our past advertising and known name to market your replacement females.) Call for more information.
- **Discounted semen available** to all customers who want to AI.
- **Discounted vet supplies** through DeTye Vet Supply.

✓ When possible, we will work with our customers to help form co-mingled loads of calves.

Upon harvest, if possible, Gill Red Angus will prepare a report, complete with feed yard and harvest data, for your use.

✓ We are also available for consultations regarding breeding, replacement heifer procurement, and all marketing options. We will help you in any way we can to make your bottom dollar grow.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We prefer for each of you to be in attendance on sale day. Realistically, we know there will be some scheduling conflicts and distance limitations. In these cases, we have arranged for you to be able to participate in the sale on an absentee basis.

If possible, you can come by and evaluate the animals prior to sale day. If distance is a problem, we can also provide you with a videotape or DVD of all the cattle for home viewing. All of the lots in the sale will be available for viewing online prior to sale day at www.superiorlivestock.com as well.

Customers tell us that the video does a good job of showing conformation, structural correctness, and how the cattle travel, etc. Our sale book, with complete data on each animal, is very helpful. Please feel free to call us with questions. In addition, there will be qualified persons on hand sale day to evaluate the bulls and answer any questions you might have.

HERE'S HOW IT WORKS

Please call Superior Productions at 800-431-4452 and pre-register for your buyer's number. At that time they will give you the bid line number that you will use on sale day to place bids over the phone. The sale will be broadcast via satellite on RFD-TV - Dish Network Channel 231 and DirectTV channel 379. The sale can also be seen on the internet at www.superiorlivestock.com. Bidders who are successful in making purchases via satellite will be contacted by Gill Red Angus after the sale to settle payment and shipping arrangements.

Selling one 10% ownership for semen interest only in Vin Diesel. In Denver at the National Western Stock Show we are selling up to four 10% semen interests in him as well. If we do not get those four all sold, we may offer what is left to you as well.

Here he is, the bull that will do it all. Let's start off with his cow family. This is one of strongest lines in the breed as his dam has a near perfect udder and has the eye appeal we all love. She is extremely easy keeping and stands on four great feet and legs. At the Santa Sale in December we sold 1/2 interest in his dam to Leonard Smith, NE for \$7,500. His grand dam is just like her, as she is big bodied, good uttered, has good feet and legs under her, and always brings in a top calf. The next 7 lots are all her sons. Gill Red Angus has only flushed 11 cows in their 30-year history, and both of this guys dam and grand dam are in this list of cows, while a maternal sister will be added to this list next spring. When you check out their production records, you will see his maternal sister has a 107.4 MPPA, his dam has a 104.9 MPPA while his grand dam has a 108.7 MPPA. Talk about maternal power! His sire is the muscle king, WR Mr. Red Dawg 5335 who scanned a 20.5 inch REA! This guy will raise you the kind of sons and daughters that will keep your buyers coming back for more. At the GRA bull sale in November, we sold 19 sons, which averaged just under \$3,800! He will give you more muscle than this breed has seen, plus Red Dawg's dam has a 107.3 MPPA and is a very big-bodied cow with a great udder and super feet. You won't find one much better than LMG Gills Vin Diesel 7611. Just like his namesake, he is loaded with muscle. He has all the bases covered. Vin Diesel is as wide based of a Red Angus bull you will find, walks like a cat, extremely easy doing and big bodied, has great eye appeal, deep in the flank, has a long extended neck, extremely classy, lots and lots of muscle, and has everything one could hope for in a herd sire. Plus he has performance numbers to no end, scanned a huge rib eye, and has the maternal power needed to make some awesome daughters. Gill Red Angus feels that this is one of the best bulls they have raised in their 30-year history! Step up and take advantage of this outstanding opportunity.

What a way to start off any sale in the country. Here are some powerful fall born ET full brothers that will turn any head in the country. They are very uniform and look just like their daddy did at this age. Their sire is the very attractive PIE Accelerator 4028 bull that we used for several years and then sold through this very sale 1 year ago. The dam to these bulls is the powerful LMG Miss Roxie 818 donor cow that has done us a lot of good. Her daughter LMG Miss Roxie 1080 was just recently sold for \$7500 for 1/2 interest to Leonard Smith of Nebraska. She is also the sire to Lot 1. This is a strong cow line and the Accelerator daughters have been good cows so far. These bulls need to be purchased and turned out to sire lots and lots of calves. Their daughters will make great cows and their sons will make awesome feeder calves. Come and take a group of them home. You will never regret it.

Here are three full brothers all sired by the Canadian sensation, RED YY Knight! Knight is a true female producer and has earned the respect of both top Canadian and U.S. breeders alike. Only a handful of U.S. breeders have tapped into these great genetics and we are lucky enough to be one of them. He goes back to some great bulls like Topper and Patriot. On the cow side, you will see the awesome LMG Miss Dynette 902. This girl has done everything one could want. Take a look at her picture and see if you can find a better cow anywhere. She is as good of a producer as we have ever had. A daughter is now one of our top MPPA cows and is in our flush program as well. She was chosen as the "Pick of the Herd" in the Denver Stock Show last January, 1/2 interest sold to Greg Lucht of Montana for \$10,500. Pick one or all three of these bulls and make yourself some top cows!

These two bulls and a full brother, which sells as lot 80, are some of the top genetics in the breed, old and new. The dam is one of the original BJR Blockana cows that has developed a great reputation throughout the breed. Several breeders have chased these cows and are flushing them from the East to the West and they are all selling right at the top of the breed as well. Red Spread is a top performance and maternal bull that really makes some top producing cows. These bulls have a lot of power to get the job done in the lot and the maternal characteristics to get it done in the pasture. Come get these guys.

The Daorv cow family will never let you down. LMG Daorv was born right here at Gill Red Angus and sold later to Forster Red Angus from North Dakota. He later sold sons and daughters all over North America, with the top one selling for \$50,000. (I wish we would have kept her) Cheyenne in my opinion is possibly the best Cherokee Canyon son out there. He really adds a lot of class and makes some very good daughters. These two bulls are very good, long made and deep bodied. They are real similar in style and I am sure you will like them as well.

Daorv 0248 has several sons selling throughout this entire auction. I would try to grab several full or half brothers and try to get some real consistent sons and daughters. Consistency always sells at the top, and when you add top quality, it gets even better. So why not raise the best, most even cattle possible. The sire to these three bulls is none other than the late LCHMN Grand Canyon 1244G. This guy is one of the best cow makers the breed has ever seen. His semen is very rare and daughters are getting extremely sought after. His dam is one of the top cows in the breed and also raised Major League and several top daughters throughout the industry. Take these bulls home and make yourself some top cows!

 Sara 817 did it again. Year after year she brings in a top calf and this fall bull is just like the rest, very soggy made, easy keeping, and just enough power to get it done. 121R by Sara was an ideal flush as all of these calves were soggy and moderate framed with explosive growth at weaning. The maternal end of Sara should carry through and make this an all around type bull. Use this guy with confidence!

 Here are some older and rare genetics. The sire is the late great Rambo 502 bull that really did the breed a lot of good over the years. One of our very top cows is a Rambo 502 daughter and is still producing right at the top at 11 years of age. The dam to this bull is also 11 years old and is a top Red Lightning daughter that is right at the beginning of the BJR Bonnebell cow family. This guy should make some super daughters as well.

 Here is another son of CCF Daorv 0248 and the past champion Perks Chateau 309R. The 309R sons seem to be all real powerful with good bone and muscle. His dam is a great cow that most commercial cattleman would love to own. I saw her a couple of times and think she is pretty special. Daorv by 309R is a winner and you will like them as well.

 What a heck of a way to start off these natural born fall bulls. This Accelerator son really puts it together right. He is long bodied, thick quartered, good top line, great feet, and out of a real good cow. She has a 105 MPPA and goes back to a former donor cow for us, LMG MTX 715. We have sold several sons and daughters out of her as well. This guy would look great standing in your pasture.

7815 is the last fall bull selling here today, and boy is it a good way to end. He is stout made and has a great look to him.

Sire of Lots 28-34

The next two bulls were suppose to be in our fall bull sale along with the rest of the coming two year old bulls, but every year the bulls sort out a couple which they decide to pick on. This year they chose these two and started to ride them, so we pulled them out, before they injured one or both of them. When we pulled them out, we threw them in with the fall born bulls. If you have ever been around a bunch of bulls of this age, you will know that once you pull them, you can't put them back as they would start it all over again. So we just decided to keep them with the fall bulls and add them to this sale.

This is the most powerful Cherokee son I have found and believe me I have seen a ton of them. He has bone, a very square hip, frame, guts, and muscle, all while standing on great feet and legs. This guy came to us through an embryo from Atkinson Red Angus, TN. His dam is a super cow that is pretty powerful herself. She is a BJR Hi Ho 916 daughter that goes back to Rambo 502 and Stryker. If you like pure power, come and have a look here. He will impress the toughest critics.
Pen 5

Lot 36

Full Brothers

Talk about guts, muscle, and power. These three bulls have it all! Check out who their dam is. She is the great LMG Sara 817 cow that was chosen as "Pick of the Herd" from our program in 2002 for \$8750 for 3/4 interest. She has earned international interest and is one of the most popular cows in the U.S. She is a moderate framed cow, but is loaded with middle. She may be the easiest keeping cow I have ever seen, and is the easiest keeping cow our program has ever raised. Her dam, LMG Sara 328, is still producing at 16 years of age, while her daughter is a proven donor cow for us as well. You will see several sons next spring out of her. Both herself and her dam have MPPA's of 105 while her grand dam has a 107 MPPA and her daughter LMG Sara 015 has a 106 MPPA. Talk about a proven cow family that is the type that the future of the beef business will be demanding. They raise extremely easy keeping, moderate framed, but very powerful sons. What more could you want. Their sire Red Dawg 5335 is the muscle machine that has given us more power, style, and muscle than any other bull ever used here. Come take a look, you will love them.

Maternal Sister of Lots 40-47

Maternal Brother of Lots 40-47

Lot 40

Lot 41

We are retaining 50% possession and 50% semen interest in one of these bulls. It will be announced sale day which bull it will be. We will take our possession each year July 20th for our summer breeding program.

Here is the most even, best set of flush brothers we have ever raised. They are outstanding from the first one to the last one. They have length, style, muscle, depth of rib, excellent feet and legs and everything in between. We will be using one of these quite hard in our program but as of now we don't know which one we like the best as they are all outstanding. Their dam is the great LMG Dynette 902. She has raised more dollars than any other cow here. To date, she has gathered up around \$140,000 on 35 different lots and they have averaged over \$3949 each! Of those 35 lots, 7 of them have been females and these girls have averaged \$5371 a piece! Plus we have nearly 20 of her daughters in our herd. Breeders all over the country really love her daughters and I know you will love these bulls. 902 is picture perfect from the front to the back, top and bottom, with lots of body and muscle in a real feminine shape, and has a great udder with finger size teats and a real tight bag. Plus she has great feet under her. I wish all of our cows looked just like her. The sire to these bulls is again the powerful Red Dawg. Last year in our Fall Bull Sale, we sold 19 sons and they averaged just under \$3800! So far, Red Dawg has done us more good than any other bull ever used. We don't have any daughters in production yet, but I am confident that they are going to be outstanding as well. You need to see the muscle on these cattle yourself to see what he does. The Red Angus breed has needed a bull like Red Dawg, and we have him. Some of the bulls in this pen really need to be scattered out across the country and used hard by other breeders. I truly believe they would do the breed a lot of good.

Here are a couple of full brothers out of Pieper Avalanche 381 that has turned a lot of heads across the country. Avalanche's dam is a super Grand Canyon daughter that is full of body. She has a lot of power and bone, and has a great udder under her. Avalanche is known for his length of body, muscle, and pure power. The dam to these two bulls is a direct daughter to the great LMG Daorv 841. We raised Daorv and sold her to Forster Red Angus, ND. Forster's went on and flushed her and raised several daughters out of her. Her most famous is Miss Forster Coppertop 591. They sold her to Atkinson Red Angus for \$50,000. Several other daughters went on and produced nationally know bulls like UBAR Grand Prix and grand sons like Coleys Mojito. The maternal grand sire to these bulls is Buf Crk VC Chief 105, who is also the sire to Glacier Logan 210. This pedigree has really proven itself out over time. Come grab one or both.

Here are 5 full brothers sired by the powerful VGW Rattler 908 and out of donor cow, DAORV 0248. This cow has done a super job, and you can see by all of her sons selling here that we think she is pretty special. She is a direct daughter to LMG Daorv 841 and VC Chief 105. These two have done an absolute great job and is as proven as you will find. Plus Rattler has made quite the name for himself as well. Our customers can't get enough of him as he will really add the pounds to his offspring as weaning time. These 5 bulls were not all raised on the same ranch and were out of different types of recip cows. Some are filled out more than others and it is due to the quality of grass they were summered on. A couple came in greener than the others, but they are starting to catch up now, but won't be caught up completely by sale day. So remember they are all the exact same genetics and should produce the same type of cattle. If I was looking to make some consistent commercial calves, I would purchase all of the bulls and raise the most even set of steers and heifers calves ever. You won't regret it. There are some real studs in this pen!

Here is another son of LMG Sara 817. She really gets the job done and deserves all the recognition she gets throughout the industry. Last we we sold two full brothers and the year before we sold one full brother. All three have sold at \$5000, \$5000, and \$4500 respectively. We Al'd to one of them this past summer. I really think this cow family is what the future of the beef industry is all about. Rattler by Sara, you can't go wrong.

Lot 62

Here are two full brothers that are out of the most talked about bull in the country. RED Fine Line Mulberry 26P is one of the best looking bulls you will ever find, anywhere. He is owned by Brylor Ranch in Canada and one of the first sons to sell up their sold for \$46,000. These guys are extremely stylish with long clean necks, thick made, smooth shoulders, long bodied, and very attractive. They will really add a lot of eye appeal to your next calf crop. If you are a registered breeder and are looking for that next great outcross or if you are a good commercial rancher, look no further than right here as these guys are what you are looking for. Their dam is the great GMRA Estonia 626, which makes these bulls maternal brothers to the super CCF Estonia donor cow that we sold several sons out of last year. She sold last fall to Polzin Red Angus of Minnesota for \$10,000. Plus Estonia 626 is a daughter of Rambo 502! What more could you want in a bull? Not only is this a classy, eye appealing pedigree, but it is also a very maternal one with calving easy and power bred into it. Check these bulls out!

Sire to Lots 62-67

These full brothers will really put some class into your next calf crop. They are again sired by Mullberry, and out of donor cow ATKN Coppertop 0246. She is a top cow out of the Atkins Red Angus program that goes back to LMG Daorv 841, and Rambo Tuo. Dad saw Rambo Tuo when he was a two year old and he thought he was one of the best bulls he had ever seen. He is a son of Rambo 502 and has done a real good job. These could be your next herd bulls.

 Here is another very stylish Mulberry son that will turn your head sale day. His dam is a top daughter out of Miss Forster Coppertop 591, who is out of LMG Daorv 841, her sire is a top son of BJR Hi Ho 916. The combination will really give you some powerful, deep bodied cows. These Mulberry bulls are very good and will give you the extra eye appeal needed when selling calves, whether it is bulls in the spring or steers in the fall. They will top the market.

 This guy is another good Mulberry calf that had a bit of a rougher start. His recip dam was on some very watery grass and he actually came in at weaning around 100 lbs lighter than most of the other bulls in the sale. He has gained some ground, but not all the way. So don't let him slip through your fingers because the bigger bulls were on some hard strong grass when this guy wasn't. His dam is a top donor cow for us. The Roxie cow line is one of our better lines and we just sold a maternal sister to this guy in the Santa Sale in December to Leonard Smith from Nebraska for \$7500 for 1/2 interest. She raised the Lot 1 bull in this sale that is absolutely awesome! Lot 1 through 8 are maternal brothers to this guy as well. Come get him.

Lot 74

OK, if you like them moderate, deep, and soggy, these guys are for you. They are very deep ribbed and easy doing. Their daughters will gain weight on nearly nothing and hold that condition their entire career. These two have good muscle and great feet. Signature is a Norseman King son and out of a Grand Canyon cow. Their dam is right out of the heart of the Brylor Red Angus program in Canada and is from his most beloved cow family. The grand dam is the great Brylor Cherok 40X cow that he has flushed as much as he possibly could. There are sons and daughters of this cow all over the world that are doing a great job. This combination really worked. You will want to check them out.

Here are five full brothers that will really make you a uniform calf crop. Uniformity always sells better, and when the calves are out of top bulls like these guys, the feeders will always come back looking for more. The dam to these bulls was raised by good Red Angus breeders, Larson Red Angus of Montana. She has done a super job over the years. Combination is a real powerful bull that will add a lot of muscle and depth of rib to your program. These guys weaned off very heavy and never looked back. Come get a group of full brothers and turn them out.

 Wow, this guy's dam was born in 1988 and lived for 18 years! This calf may not be the most powerful one in the group, but he has the most stay power of any of them. Buy this guy and make some daughters, as many of them as you can possibly make, because you won't find many bulls in the breed that is out of a more proven cow as she has a 102 MPPA and has the age you have to respect!

 Here is another real good Gold Robber son that is out of a well known cow family. His dam is the grand dam to Brown Miss Abigrace. She has produced over \$400,000 in her career, has sons and daughters in several different purebred ranches and semen studs. 8508 is a very stylish made bull that will turn your head sale day. Not only does he look good, but he weaned heavy and has a great set of EPDs. There are not many Gold Robber sons available anymore as his semen is tough to find and sells for over \$100 a straw. So between him and his 102 MPPA dam, this guy is a great choice, so come get him.

WW: 669 lbs.
 Here is a real classy Cheyenne son that will turn some heads sale day. He is a dark cherry red bull that has a lot of style, length, and a super pedigree. He goes back to the great Lakina cow line and EBV as well. In my opinion, Cheyenne is one of the best Cherokee sons available and it shows with this guy. Come have a look and take him home.

Retaining 50% possession and 50% semen interest. Here is a natural born calf out of a first calf heifer that just happens to be a daughter of the great LMG Miss Dynette 902. He has done a super job keeping up with the big boys since he came out of a first calf heifer. It just shows how good this Dynette line really is. His sire is from another top cow line here at Gill Red Angus. He is out of the Sara cow line that has gained the whole industries respect the last couple years. With both Sara 817 and Sara 015 in this pedigree along with Dynette 902, you absolutely can't go wrong. Plus when you study this pedigree you will find LMG Poteet 419, she marks the 4th cow in this pedigree that has been flushed here at Gill Red Angus. If you want to make some great cows, this is the bull to buy as they will be easy keeping and awesome producers!

 We purchased this guy's dam from Chappel Red Angus through the Kyle Gilchrist sale this summer called the Star Studded Event. In my opinion this was the top pair sold that day. They came home and the bull got a little sick and it took about a month to finally get over it. Not sure what he had, just didn't feel good, it wasn't a lung problem. Anyway, he is a bit behind because of it, but he is a real good bull that will be the buy of the day. Don't let him slip through your fingers.

**Heifers**

Consigned by Hofland Ranch from Reeder, ND • 701-853-2461

- 41 head of Straight Red Angus open heifers
- 4 head of Brockel Faced Red Angus/Hereford open heifers

Lot 3

**Heifers**

Owned by Gill Red Angus

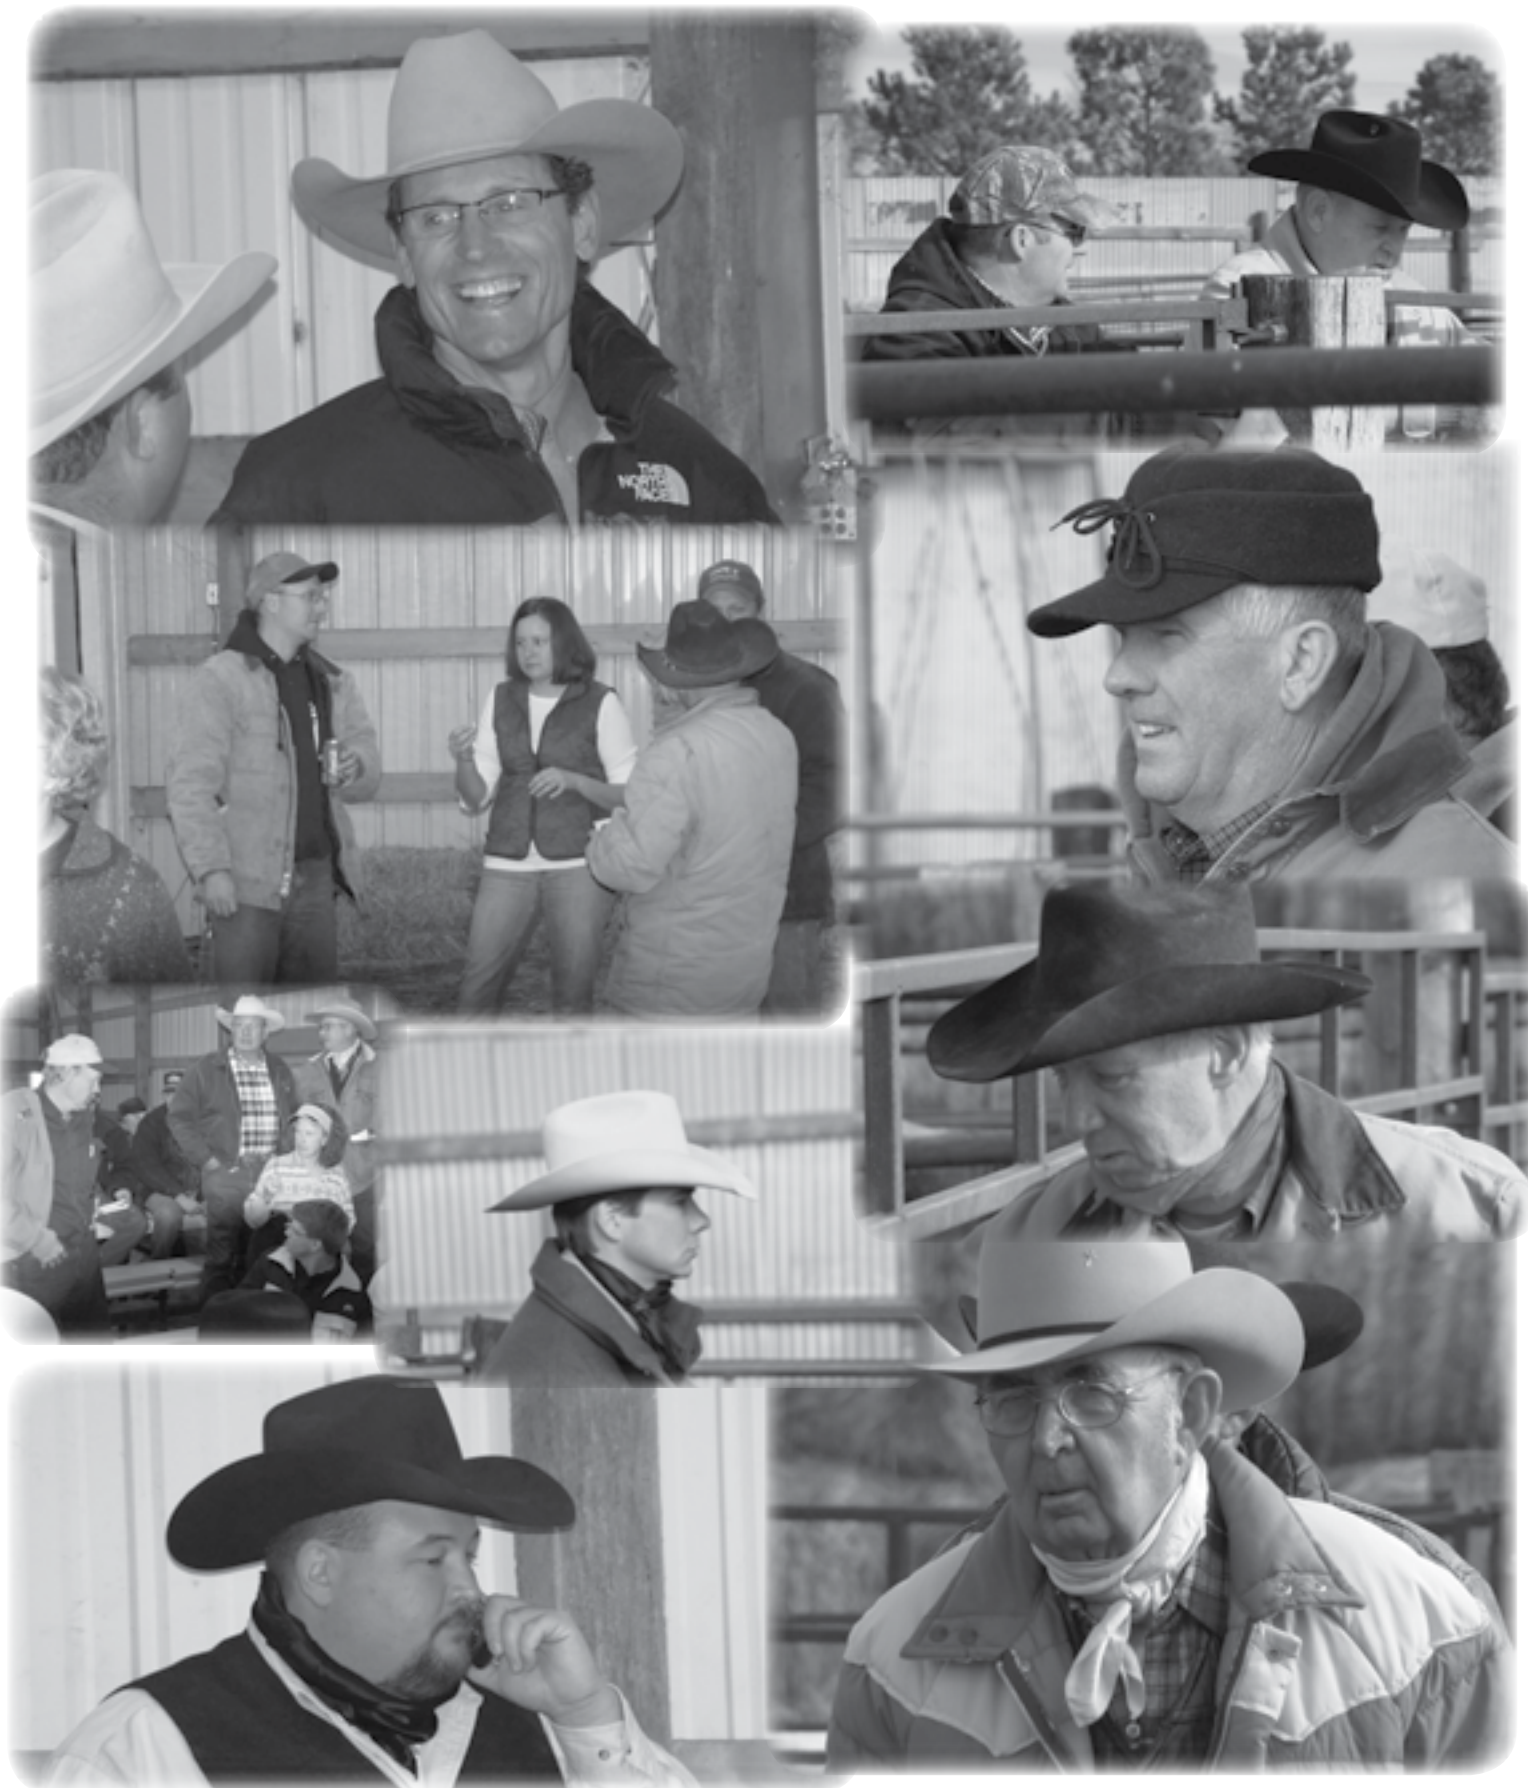

- 50 head of Straight Red Angus open heifers

These heifers are definite replacement quality. Fancy is what I call them. They will be weighing around 700 lbs sale day, and ready to be turned out to make you a cowherd. We have actually purchased the Tarter heifers in the past and sold them through our fall bull sale in 2007. They topped out at \$1500 and the buyer loved them and came back and bought another group of heifers from us this past fall. Both Hofland and Tarter have been buying bulls from us for years and the quality runs deep in their cowherd. All of these heifers will have a lot of stretch and body to them. We purchased the heifers we are selling from Hooper Red Angus. These are also some top quality heifers. To give you an idea of the quality of bulls they are using, the bulls they have purchased here have either been the top sellers or right close to it. They buy the best they can and then AI to these bulls. This past fall we purchased Tarter's, and Hooper's steers and Hofland's steers sold for \$1.26 on video weighing 525.

The quality is deep all the way across the board here and they are raised by commercial cattlemen who make the cows work for them, not the other way around. Red Angus heifers are hard to come by, so here is your chance. Don't miss out.
