SALE ORDER

Cattle will sell in catalog order, but are subject to change on sale day.

INSPECTION OF CATTLE

The bulls and registered heifers are available to be viewed at Gill Red Angus anytime between now and sale. All Commercial heifers will arrive at Gill Red Angus on Sunday, February 18. To view before we encourage you to contact the consignors.

LOT TAGS

Ear tag numbers on the sale cattle will correspond to the sale catalog.

NO LOAD OUT AFTER DARK

No load out after dark on sale day.

DELIVERY OR \$\$\$ OFF

Pick up your bulls on sale day or the following day and receive \$50 off each bull purchased. Or Gill Red Angus will assist in making delivery arrangements of the sale animals to the new purchaser's destination at the least cost possible. Free Shipping up to 300 miles on bulls and registered heifers purchased for \$2500 or more. All such deliveries are at the buyer's risk.

SALE TERMS & CONDITIONS

Any terms and conditions not covered by the catalog will refer to the Standard Terms & Conditions set forth by the Red Angus Association of America.

GILL RED ANGUS GUARANTEE

All bulls that are in good breeding condition at the beginning of the first breeding season are guaranteed breeders. This does not include any injury. Any bull that settles one third or more of the healthy cows he services or passes a fertility test made by a competent veterinarian during the first six months after the sale date is considered a good breeder. All claims for adjustment or refund must be made within six months of sale date. All bulls returned must be in good and healthy condition. Any bulls given a fertility test within the first six months after the sale date will be at the buyer's expense. All bulls are guaranteed to be breeders, however, no guarantee is given that the semen collected from a bull will freeze.

GENETIC DEFECTS

All known cattle with a genetic defect within at least 3 generations have been tested and/or eliminated.

INSURANCE

Gill Red Angus will pay 25% of the premium on all purchased bulls available.

"You Buy Our Bulls, We Will Bid on Your Calves"

The Gill Red Angus Customer Marketing Program

“You Buy Our Bulls, We Will Bid on Your Calves”

Something that sets us apart from most of our competition is our Customer Service Program. Our slogan is “You buy our bulls and we will bid on your calves.” This has really helped our customers on selling day. We ran some calves up as much as \$5 per hundredweight. You add that up on a load of 600-pound steers, and you made an extra \$2,500 just by being our customer. Compare that to our sale average the last couple years - that’s a free bull. How can you go wrong?

Here is how it works:

✓ First you must be a Gill Red Angus customer. At marketing time, contact Gill Red Angus with the marketing option you wish to pursue:

- ***Complete Retained Ownership***
- ***Partial/Partnership Retained Ownership***
- ***Livestock Auction or Off-the-Farm Marketing*** - Sell 100% of your calves off-the-farm or at the stockyards and a Gill staff member will be there to place a bid on them for you.
- ***Replacement Heifer Marketing*** - Market your top-quality open and bred heifers through our annual production sales in February. (We have spent thousands of dollars on advertising over the years. Use our past advertising and known name to market your replacement females.) Call for more information.
- ***Discounted semen available*** to all customers who want to AI.
- ***Discounted vet supplies*** through DeTye Vet Supply & River Ag.

✓ When possible, we will work with our customers to help form co-mingled loads of calves.

Upon harvest, if possible, Gill Red Angus will prepare a report, complete with feed yard and harvest data, for your use.

✓ We are also available for consultations regarding breeding, replacement heifer procurement, and all marketing options. We will help you in any way we can to make your bottom dollar grow.

“You Buy Our Bulls, We Will Bid on Your Calves”

Gill Red Angus

Hello ranchers,

This has been quite a year with calf prices climbing and cow numbers declining. Prices this past fall and over the winter have been outstanding. Nearly everyone received more for their feeder calves this fall than last year, while prices in both cull cows and bulls have been selling higher than ever as well. The demand is so strong and I don't see it weakening, as the world population is growing extremely fast (63,072,000 every year) while more and more farm land is getting covered up by city and more pasture land is getting broken up and planted to corn. I don't know, but it looks like we have our hands full growing enough food. This also tells me that agriculture is sitting on top, as everyone needs to eat. With the declining cow numbers the last two years, I believe prices in the fall of 2013 will be extremely high, and if the corn-belt has an average rainfall season this year, \$2/lbs for six weight steer calves will happen.

With that in mind, we encourage you to take a look at this group of bulls - we are very excited about them. The twos are stouter than ever, really sound, and did great over the summer on grass and over the winter in the lot. These bulls are getting better every year, but they should be as we have sold over 200 head of cows from the bottom half of the herd over the last three years. We feel our cowherd is the best it has ever been. The yearling bulls weaned off heavier than normal and have done really well over the winter. The bulls are about 100 lbs heavier as they are stouter, thicker, deeper, and longer than years past.

We are feeding the bulls a little different than most. Last year, we went to a no corn diet which worked well and we have decided to continue it this year, as we feel it is more digestible and easier on the animal. The ration for both sets of bulls consists of silage (10 bushels to the acre), ground wheat straw and corn stalks, modified distillers, sugar beet pulp and a liquid mineral. By doing this, they seem to hold up great after being taken out of the lot and turned on grass.

The commercial heifers are also better this year. The replacement heifers will be heavier than years past, and are real impressive. The bred heifers are about as good as you can raise them. If you are serious about the cow business and need some replacements, you NEED to take a look at this group of bred and open replacements!

Last but definitely not least, we have really worked hard over the years making sure our customers get paid well for their calves. This fall we traveled all over ND, SD, NE, and WY to calf sales bidding on your calves and it has truly made a difference in what commercial Red Angus calves are worth. For the second year in a row, Mobridge Livestock and Gill Red Angus put on the Red Angus calf sale in October where just over 6000 calves sold with only two of the consignors not having Red Angus. This is the largest Red Angus calf sale in the country and the majority of the consignors are Gill Red Angus bull customers. It is amazing the phone calls we get from feeders looking for Red Angus calves because of this sale.

Since thousands and thousands of bulls were pounded out last fall and over the winter, I would recommend you replace them early. When it rains in April, the prices will be out of sight on every type of beef animal.

For your convenience, we have switched back over to Superior Livestock this year. It will not be on TV, but it will be broadcast live over the Internet. You will be able to bid over the phone or on the net through Superior. As in years past, if you cannot make it in person or on Superior, we can handle your bids for you. We have done this for several customers in the past and it has worked great for them. Just let us know your needs and we will try to make it work.

Gill Red Angus has been selling Red Angus bulls now for 34 years. We are in it for the long haul and will always work for our customer, whether it is raising powerful bulls that produce top cows and feeder calves or being there when you sell to make sure you get top dollar for your calves. Plan on Gill Red Angus being around for another 34 years to supply you with what you need.

See you on the 19th!

76 heifers

Commercial Bred F1 Heifers

Jerry Dubois • Holabird, SD

605-870-0862

26 heifers

76 Commercial Bred Heifers

A couple years ago Bob called us and decided he wanted the best Red Angus heifer calves available to breed and then sell as breds. This is the third year we have done this for him and he just purchased his first group for next year from Sandy Willow Red Angus on January 10 for \$1260. Anyway, these heifers are as good as you will find. All the heifers have been ultrasound tested for pregnancy and the February bred heifers have been marketed in NE and he held the March calving heifers for our sale. All of his February heifers have averaged right at \$1900 each this fall, and they weighed them getting on the truck on December 22nd as they left, and they weighed on average 1225 lbs. All of their weight comes from depth, muscle, and length of body. They are the perfect frame, and come from some top reputation herds. I can't stress enough that he only buys and breeds the absolute best. Last year the sisters to these heifers topped at \$2500 and bottomed at \$1900 for an average of \$2031 on 93 head. They should all calve in March except 5 head that will be in April, as they were ultrasound tested and sorted this way. This set of bred heifers will sell first, then the F1 Baldies and then onto the replacement heifers.

26 Commercial Bred F1 Heifers

Exposed to Rausch Hereford calving ease bulls from July 10 to August 28.

The were preg tested October 11 and vaccinated the same day with IBR-Virashield 6 L5HB and poured with Vetrimec 5L.

This real good set of bred heifers will be tough to match. Especially if you are wanting F1's. I honestly don't know where you will find any F1 heifers, except for these. They are big bodied heifers and in pasture condition. These heifers are F1's two different ways. The first is Jerry purchased a group of commercial bred heifers through our sale several years ago and he bred them to Knippling Hereford bulls which resulted in these F1's and the other way is he has a good group of Hereford cows that he bred to our bulls, which also resulted in F1's. They are all home raised and good. They were wintered as calves and this winter on lick tubs and hay. The average weight on December 28th is 1010 lbs. It doesn't happen too often that you are lucky enough to even find a set of F1's, but to find a set as good as these are even harder to find. Don't miss out.

120 Open Replacement Heifers

Every year we market some replacement heifers for our customers through our sale. This year we have 120 head from 5 different customers. These heifers have proven themselves to make great cows for the owners. We have stayed in touch with past buyers and they have all commented on how maternal, easy keeping, and sound they are. They should be, as we work REALLY hard to make sure the bulls we sell come out of this type of female. Our customers heifers have always demanded top prices as the reputation is out there that they make great cows. Depending on the age of the heifers, they will range in weights from 700 lbs to 850 lbs. A couple of these consignors calve in February while another calves in April. But if they were all the same age, you probably couldn't tell them apart from each other.

Pasture Exposed: LJC LANCER 313Y

Retaining a 1 time flush on her with a minimum of 6 eggs.

Well it took a lot of thinking and more thinking, saying yes, saying no, but we finally decided we would put this girl in the sale. LMG Miss Dynette 1329 is one of the best genetically made females we have ever offered for sale. Her dam is the cow we call the greatest cow to ever walk our pastures. We have sold over \$100,000 worth of progeny off of both her and her dam, LMG Miss Dynette 902. This line is by far the strongest cow family we have ever had. We are currently using 2 sons of Dynette 902 and 3 sons of Dynette 3041 in our program. The sire to this good heifer is the great RED Towaw Indeed! He is possibly the best cow making bull the breed has ever seen. His daughters have the prettiest udders, are very feminine, easy fleshing, and sound made. He bred cows naturally until he was 8 years old, so there is a lot of stay power here as well. His semen is impossible to find, and if you luck out and get some, it is worth more than one can afford. We happen to be extremely lucky and get some from some Canadian friends affordable. Thanks again guys!!! LMG Miss Dynette 1329 is a full sister to the \$23,000 LMG Gill No Doubt 9018W who we sold to ABS and a group of guys. He never made semen that froze well enough for ABS, which is a big let-down, but the guys who used the semen we collected just love the results. Make sure you check out Lot 109 in the yearling bulls. He is awesome and a son of No Doubt. The only reason why we are letting this girl go is because we are currently flushing a full sister who is a couple years older than this girl, and have 2 full brothers we are also using. We wouldn't be selling this heifer if we didn't have the other girl in the flush center right now. 1329 is a real moderate framed heifer, very deep made, real sound, gentle, feminine, long and pretty much an ideal type heifer. I have no idea what this girl is worth or what she will sell for. But if you are serious about having the best whether you are just starting out or have been in it for a while. You really need to take a good look at this girl, and then study what her Mom, Grandma, and sisters have done for us, and think about what she will do for your program!

Pasture Exposed: LJC LANCER 313Y

This girl is about as hard to let go as the last heifer. Her dam is AWESOME and has the look that we all dream that our cows would have. Take a hard look at her dam's photo. She is our poster child for the ideal made cow. 77010 is a maternal sister to LMG Dynette 3041, a daughter of LMG Dynette 902, and a son of the great BJR Monu 4X bull. She has a son selling as Lot 182 as well. He is a moderate made bull who is built like a hog. The daughters out of 77010 will be real easy fleshing and full of power! The sire of 1293 is the powerful LMG Gills Vin Diesel 7611. We are selling over 25 bulls in the sale out of him. Take a look at them all, you will get a good idea of what he will do. His daughters have nice udders, have a bit more power, and are easy fleshing sound made cows. I have huge hopes for this heifer, as she is one of our absolute best heifers phenotypically and genetically in our replacement pen. She is real deep and powerful, long made and will be one of those cows that you will want to keep along the highway so everyone can look at her.

Dam to Lot H3

Well, we had to put in another heifer that would keep up with the last 2, and here she is. This girl genetically is real exciting to me. Let's start with her sire, he is the great No Doubt bull, full brother to Lot H1. We already talked about the Dynette line and what it is capable of doing, so we won't waste your time. So now let's move to the maternal side of the pedigree. Her dam is none other than the great LMG Roxie 4110 cow, who is a maternal sister to LMG Gills Diesel 7611, a daughter of the great LMG Roxie 1080 cow, and granddaughter of the powerful LMG Roxie 818 cow. All three of these cows have been donor cows and have been in the flush center at the same time over the years. The Roxie cow line is what we feel is our #2 cow line. But with the combination of the Dynette line on the sire side and the Roxie line of the dams side, who knows what will happen. It will be exciting. There are several maternal brothers throughout the sale.

Pasture Exposed: Victory

LMG Miss Cinnamon 1310 is another real well made heifer that is easy to look at. The Cinnamon cow line has been around here for years and years. They are the kind that consistently does it year after year, quietly bringing in the top bulls or heifers. We have never made a big deal out of them, flush wise, or promotion, but they are the kind that makes a program. Not all the families can be in the big city lights, but they all need to be the kind that will move a program forward, and that is just what this line has done for us. She is one of the better looking heifers in the sale, and will work for any program in the country!

We purchased the dam of LMG Miss Candy 1314 from OHR a few years back at one of the Santa Sale's. She is a big bodied cow, who is real sound made, easy fleshing, and has a great udder as well. 1314 is the same, as she is a real deep made heifer, with a lot of style. I really like her eye appeal and has that brood cow look to her. Her sire is the everlasting DKK Addiction N10 bull, who was the high selling at the Midland Bull test in 2004 and bred cows naturally until 2010 as a 7 year old. If stay power in your program is important, then you better take a good look here.

Pasture Exposed: Victory

Here is another big bodied heifer with a great look to her. She is darker red, deep bodied, sound, and real broody. Her sire is a bull we sold and Al'd to out of the great Brylor Pasquale 213P bull. His dam is the famous Blockana 1218 cow who is a daughter of EBV. MTX 1298 comes from the good MTX cow line, which is in our top 5 or 6 cow lines here and never misses. Her dam is a daughter of the good OHRR Dakota Rambler 75R bull we used hard. The daughters from him have great udders and are top calf raisers. This heifer is the kind you will take home, turn out, and she will only bring you easy selling bulls and top replacements for your pen.

Pasture Exposed: LJC LANCER 313Y

0418 is the result of our Fall calving program which we decided to not do anymore. Northern South Dakota isn't the best environment to have fall cattle if you don't have the facilities to keep the little guys out of the weather. So we didn't turn a bull in with them in November and held them open until June and mixed them with our spring calving cows and moved forward. That is why she is born in Septmeber, but not bred until spring. She is a real pretty made heifer with a lot of eye appeal. The Dianne cow line is a long lasting cow family and one of the oldest for us. We purchased our first Dianne cow from Sodak Red Angus in either 1982 or 1983, and we purchased our very first Red Angus cow in 1979, so that tells you how long and how good this line has been for us.

AI Sire: Victory

Pasture Exposed: LJC LANCER 313Y

Here is another fall born heifer with the same story as the last. In fact her story is almost the exact same. We purchased our first Rita cow from Sodak Red Angus in either 1982 or 1983 as well. These top cow families that stay around generation after generation have really paid for the ranch. They will for yours as well.

This is another Dynette 902 granddaughter who will do a great job for you. She is a 3/4 sister to Lot H2. The two have the same great genetics and you will keep them around forever. You will love the powerful bulls this girl will bring in.

1355 is a bit bigger and more powerful heifer that will raise you the type of bull that the commercial rancher will love. Her maternal grand sire is the powerful, past national champion Mr. Beef. His daughters have been good cows as well. Her sire is Vin Diesel and the combination will make great offspring. Come check her out!

Retaining a 1 time flush with a minimum of 6 eggs.

Once in a while a calf comes along that has everything one could ask for. This girl is that heifer. First off she is the heaviest actual weaning weight calf we have ever raised. She was born on February 29 and was weaned on Nov. 13 and weighed 892 lbs with nothing but grass and mommas milk. She stuck out like a sore thumb all summer long. But she isn't only a heavy heifer, but she is a great looking heifer out of a supper cow. She is real attractively made, the kind that would work at the Denver Stock Show if that was your thing. She is real deep bodied, has a big middle, real sound, long, and flat out good. We have never seen a heifer come off the cow like this before and she hasn't slowed down one bit since then. She isn't built like a big heifer, but she is one. I don't think she will mature real big either, as her dam is the right size and type. After I got to working on these footnotes I realized something, it is the cow family that got it done on this calf. A maternal sister, a first calf heifer, raised Lot 120 in the bulls and he weaned off at 812 lbs! This is why we are so adamant about using herd sires that come out of top cow families. Every breeder needs to take a look at this heifer. She is impressive!!!

To me this is the most attractive heifer in the sale. As a good breeder once told Dad, cattle that looks like this have the "P Factor" or pizazz. She is the first one you see when you walk in the heifer pen. She walks with her head held high saying look at me. She is dark red, big bodied, and real long made. She is also a gentle heifer, that likes to be looked at. She has a little different breeding on the maternal side of the pedigree and is out of the great No Doubt bull. She will be a calf raising fool while being a front pasture cow.

Here are a couple of our full sister embryo heifer calves. Their genetics are some of the freshest and most exciting we have. The dam is a top donor cow here who has several sons selling throughout the bulls. She is a real big bodied cow with a great udder, and is very sound made. Check out their full brother, Lot 108 in the yearling bulls. He is very impressive and the daughters out of him will be fabulous. These two heifers might not be the flashiest ones in the pen, but they will be some of the best cows. The Grand Statement bull iconisistently produces sons and daughters with deep bodies, longer made, and thicker quarters and top lines. We are real glad we made that purchase. He will do us a lot of good. Take your choice on these 2 heifers. We will keep the one you don't pick.

Here is another choice lot. You get to pick from these 2 Red Dawg daughters who are out of the great Lass 5014 cow. Check out all the full brothers selling in the yearling bulls, like Lot 113. He has a lot of power. Also a full brother sold as Lot 1 in our bull sale 2 years ago. He was a machine. Check out his photo here. Red Dawg will always add power, eye appeal, and muscle. These two are no exception. They are outstanding in quality, and fantastic in eye appeal. You take your choice, and we will keep the other one and make a great cow out of her.
