What a great way to start any sale in the country. This guy is full of body and muscle and stands on a great set of feet and legs. Take a look at his photo and try to draw one thicker and deeper. He has a good disposition as well. His sire was one of the top selling bulls that sold to longtime customers, Dan and Tara Hooper of Nebraska in our 2011 sale. We are selling a handful of his sons and they are all similar shaped and style. You will easily find this guy sale day. **Pen: By the barn**

Here is the first of many Vin Diesel sons we are selling. These Vin Diesel sons have been very well accepted, and it is really easy to see why. They are all long made, thick butted, stylish, deep sided, and sound. This guy is all the above. His dam is a half-sister to Lot 1's dam and has a 104 MPPA. You gotta love the 85 lbs birth weight along with the 721 lbs. weaning weight!

1839 is a long made Addiction son that will work for you. We used Addiction for several years, primarily on heifers. This will be the last set of Addiction sons we will be offering as we finally sold the old boy. The dam is a good Fehrman cow we purchased through their dispersal a few years back. She really adds some power to this Addiction son.

Here is another real powerful Vin Diesel son who is out of a great cow family. His dam has a 102 MPPA while his maternal grand dam has a 101 MPPA. His power not only shines through in his appearance but also in his numbers. He has a 738 lbs weaning weight while his weaning weight EPD is in the top 3% and yearling EPD in the top 5%. So if calves that wean off heavy and do it in the feedlot are a goal, this is the guy for you!

OK, here is the bull everyone should want. First his sire, No Doubt, is the \$23,000 bull we sold a few years back. No Doubt's sire is the great Indeed bull who bred cows until he was 8 years old. No Doubt's dam LMG Miss Dynette 3041, who we call the greatest cow that ever walked at our ranch. Now, the dam to 1809 was 13 years old before we sold her as a short term cow last fall. She was one of the better cows ever here as well. We sold several sons and daughters out of her, but the most highly recognized daughter would be the girl we sold to Nordlund Stock Farm in Minnesota. They flushed her and got several embryos out of her and a son was then sold to ABS Global. So if you want power and maternal by longevity, this is the guy you want! **Pen: 100**

WOW!!! Take a look at this guys weaning, 915 lbs and only a 85 lbs birth weight!!! That is unheard of here and most other places as well. His EPDs for both weaning and yearling are in the top 1% of the breed. I don't know if we have ever had a calf wean this heavy before, but as I study the pedigree and see who is in it, it starts to make a bit more sense. His maternal grand dam is the real good LMG Miss Lady 4046 cow that is nothing but body and all about performance. Check out her son selling as Lot 109. He is all about performance as well. This guy should really go into a registered herd, but I am sure a top commercial rancher will get him and love him and his calves. Come check him out, he might be the heaviest weaning bull to sell in the breed this year.

Once in a while we have a few calves that are born a little earlier and was meant to be sold as a yearling but something wasn't right and they needed to be held over like a sore foot, or got a little sick and never kept up with the others, or was found and weaned later, etc. This guys is one of those, at weaning time he got the weaning sniffles and never kept up with the group. He was too good to get steered over being sick, so once he got over it, we threw him in with the May/June calves and made a two out of him. That is the beauty of having 2 groups of bulls to sell. However, we never hold any back that was offered for sale. If we put them up for sale as a yearling, they either get sold as breeding stock that year or the get hauled to Mobridge Livestock and get pounded out. This guy is an embryo calf and is out of the powerful Full Throttle bull and out of our good Roxie 4110 donor cow. He will add extra depth of body and performance with a touch of maternal. You will like him! Full brother sells as Lot 30. **Pen: 200**

Here is another real good No Doubt son whose dam is a 1/2 sister to the first 2 bulls selling here. The Accelerator bulls daughters have really done a nice job for us. It really pays to do your homework. When we purchased him from Pieper Red Angus, NE we went out through the cows and found his dam. We really liked her and thought she was the best cow in the group. At that time Accelerator's sire, Advance 121R was real popular and he had pretty good numbers. But by the time we weaned off Accelerator's first calves, Advance 121R's milk EPD had taken a dive. But Accelerator's didn't really fall to bad, and as you can see, his daughters are doing a top notch job. This is one reason, why I make it a ranch rule that we must see the bull's dam before we step in and buy him. Oh ya, check out the weaning weight on this guy. **Pen: 200**

In the fall of 1991 we had a mature dispersal sale. That summer we had a plan of synchronizing the cow herd and AI'ing them to some popular bulls to help them sell. So we did, we synchronized them and the next morning we went up to heat detect, and there stood 2 big Charlais bulls who came to visit from a mile away from a neighbors pasture. Needless to say, they bred some cows. We had to give some money back on a few that were sold and had a white calf, and we also had some cows we were keeping in there who had a couple white calves as well. We kept those heifers as cows, and they made some real good ones, and ever since we have kept daughters and granddaughters as replacements out of them. These cows and their daughters are commercial but are sired by the same bulls that are in their respected age groups. This guy's dam is a great-great-granddaughter of one of those original 1/2 Red Angus 1/2 Charlais born calves.

So if my math is correct, this guy is 98.5% Red Angus which would make him nearly pure Red Angus. We could have kept the papers up on them and he could be a Registered as a Category B, but we decided to just keep them as commercial. The only thing different about him from the others is he doesn't have EPD's, papers cannot be transferred, and his offspring doesn't qualify for the yellow Red Angus tag. Otherwise everything else is the same. He is a real good bull and needs to get used. Come check him out. **Pen: 200**

Retaining 1/4 semen interest

This guys sire is a full brother to No Doubt, the \$23,000 bull out of Dynette 3041. We kept him for our own use that year. As they grew up, I actually liked this guy a little better than No Doubt as he had a touch more body to him. 1864's dam is out of the super OHRR Dakota Rambler 75R bull we got from OHR Red Angus, ND. We purchased him because of the cow line he was out of. His dam was a flat out gorgeous made cow, and the entire cow line had the prettiest udders you would ever find. He really passed it onto his daughters, as they are really nice. The combination of Dynette 3041 and Scarlette 10H should be great and the daughters will be tremendous. Don't miss out!

When I write these footnotes it seems like I am consistently bragging about this guys dam or that guys dam, well I am going to do it again with this guys dam, as she has one of the highest MPPA's in the herd with a 111! She is a very well made, easy keeping cow, who has a nice udder, good feet, and a lot of go in her calves. Last year her son was one of the top selling two-year old bulls, and I am willing to bet, this year will be the same. These Monument sons are all really good, thick, and long made. You need a trailer load of them. This guy has some awesome weights as well, check out the weaning of 768 lbs and the moderate birth of 84 lbs. He will get some serious lookers on sale day! **Pen: 201**

1868 is one of my favorite bulls in the sale. He has a great look to him, very smooth made, thick rear, deep bodied real sound, travels great, and has a herd bull look to him, but yet has a lot of calving ease bred into him. He is one of the first bulls you see everytime you walk into the pen. He is very classy and would work on a halter. That wouldn't happen here, but his daughters would be the kind that would work in the ring or the pasture. Eye appeal always sells, and his calves will have that!

Another good Addiction son out of a great cow line. There are a handful of cowlines that have been around forever and have lasted the test of time here. We consider them the heart of our program, lines like the Sara, Dynette, Lass, MTX, and Roxie. The other lines are pretty good as well, but it seems like the very best as a group have these names. This guys dam is a Roxie and a direct daughter of the great Roxie 1080, who is also the dam of Vin Diesel. She is also a maternal sister to the good Roxie 4110 cow who has a handful of embryo sons selling throughout the sale. Why not buy a bull out of a long time proven cow line, you know the daughters will be good.

You will find a lot of Addiction's sons selling throughout this two-year old group of bulls. We used him for several years. We finally sold him a couple years ago. If my memory is correct, we kept him and used him until he was 7 years old, and the only reason we sold him was he got into a bull fight and hurt a hind leg, otherwise he might still be around. He was one of the best footed bulls we have ever used.

Here is one of those older bulls that we held over instead of selling as a yearling. We don't try to make excuses for our cattle, but when one has a case of foot rot as a calf and he comes out of it, but still loses at least 50 lbs. to 75 lbs. We don't think it is his fault. We should have caught it earlier and then he would have probably sold in the top of the yearlings a year ago. He has a maternal brother selling in the yearlings and he has always been one of my favorite bull calves this past summer and all winter. This guy's mother is a super cow and 1548 will most likely be the buy of the sale. Don't let him slip through your fingers! **Pen: 101**

In 1999 Chad Pederson of Broken Heart Ranch and I traveled down to NE and attended the Straka Red Angus dispersal sale. We purchased a couple cows there and this guy's great grand dam was one of those girls. She turned out being an awesome cow and ended up being a donor cow for us. She was an ideal type cow, moderate sized, but very powerful, and died last winter at the age of 14. We ended up combining some of our top lines as you will find both Sara and Roxie on top of the great Straka cow line. By combining these good cow lines, great things happen and you will see it with this guy as his weights are awesome with an 86 lbs birth weight and a 772 lbs weaning weight!

Lucht Red Angus from MT is business partner of ours, we own some cows together, lease some from him, and have a few herd bulls in partnership. The cows we lease and own together are actually ran out at his ranch and the calves are then weaned and sent back here. We wean the February and some March bull-calves in September and sell as yearlings and then wean the rest a bit later and bring them over later in the year. These guys are then held over as 2's and were never offered for sale as a yearling. That is why this March calf and all the other three digit ID numbers are two's instead of being sold as yearlings. This guy is a real good bull and has everything one could need in a bull.

Here is another awesome weighted bull. His dam is a Dynette 3041 daughter and did a great job on her first calf and earned herself a 107 MPPA. We really like this guy and his pedigree and are thinking about collecting him and using him on our heifers. Come check him out yourself.

This is another real good No Doubt son that really performed well on his dam, weaning off at 800 lbs! His dam is a great cow who has earned a real high MPPA of 109! Don't miss out on this maternal monster!

OK, this is one powerful machine. He may be the most impressive individual in the sale and one of the most impressive bulls we have ever sold. If he would have a little more attractive EPD's the registered world would be all over him as he is flat out good! He walks extremely wide, very thick and deep made, real sound, dark cherry red, has a great coat of hair on him, and walks like a cat, while being out of a real good cow who has a 103 MPPA. There isn't much of a hole in him phenotypically. I think he is extremely good! You need to come check him out yourself. I know you will be impressed. Just look at his photo, he is a machine!

This is one of the few Wide Spread sons selling this year. He is good and his pedigree tells me he will breed that way too.
